ABSTRACT

Descriptive statistics are presented on students in Florida's State University System (SUS) who were previously enrolled in one of Florida's 28 community colleges. A series of tables present fall term data for 1983 through 1985, including information on students' sex, race, and age; SUS enrollment rate of community college students; credits transferred; distribution of students by the university at which they were registered and the community college from which they transferred; grade point average (GPA); and student majors. Highlighted findings included the following: (1) in fall 1985, there were 45,919 former community college students enrolled in the SUS, representing 43.1% of all SUS undergraduates; (2) distribution of students by race and sex remained fairly constant from 1982 to 1984; (3) females outnumbered males in 1983, 1984, and 1985; (4) the percentage of white students increased between 1983 and 1985; (5) 32.6% of the transfer students were in their first year of study in 1985; (6) in 1985, 77.1% of the students were in their first, second, or third year in the SUS, (7) the majority (78.7%) of students in 1985 transferred 60 semester hours or more upon entering the SUS, representing a slight decrease from 1984 and 1983; (7) transfers tended to enroll in the university nearest their community college; and (8) most transfers earned a GPA of 2.00 or higher while enrolled in the SUS. INTRODUCTION

This report presents descriptive statistics on those students in Florida's State University System (SUS) who, prior to enrolling in their respective universities, were enrolled in one of Florida's 28 public community colleges. In the fall of 1985, there were 45,919 such students which represent 43.1% of all undergraduates in the SUS. In 1984, there were 47,217 transfer students and in 1983, there were 43,748.

The Articulation Agreement, Rule 6A-10.24, Florida Administrative Code, facilitates the transfer of students from the colleges to the universities. That agreement also encourages the divisions to cooperatively conduct research. It is in this spirit that articulation reports have been produced by the Division of Community Colleges since 1973. In 1974, the SUS established the Student Data Course File which contains records of all students enrolled in the universities. Since then, a stable format of that file has allowed comparisons of students over time.

The reader will be interested in comparing groups of students of concern to him or her. Comparisons are not made herein, but sufficient information is provided for the reader to compare groups. Only brief comments will be made on the data and emphasis will be on the totals.

Tables 1, 2, and 3 present by sex, race, and age respectively, the frequencies of undergraduate students in the SUS where college of last attendance was a Florida community college. The distribution of students by race and sex has remained fairly constant during the three-year period 1982-84. Female students outnumbered males in 1983, 1984, and 1985. A significant increase in the percent of white students took place during this time period.

Table 4 shows that 32.6.0% of the transfer students were in their first year of study in the SUS in 1985, a decrease of 4.5% since 1983. This percent decreases as the number of years in attendance increases. In 1985, 77.1% of the students were in their first, second, or third year in the SUS. In 1984, that percent was 79.2 and in 1983, it was 80.4%.

Table 5 clearly shows that the majority (78.7%) of students in 1985 transferred 60 semester hours or more upon entering the SUS. This rate is slightly less than in 1984 and 1983. Table 6 shows the total number of semester hours accumulated, including hours transferred, toward a degree.

Tables 7 and 8 show the distribution of students by the university at which they were registered and the community college from which they transferred. Percents in Table 7 are for columns (universities) and in Table 8 are for rows (community colleges). No particular trends are noted over the three-year period except that Table 8 indicates that the largest percent of transfers from a community college tend to enroll in the nearest university.

Table 9 shows that most transfer students earned a grade-point average (GPA) of 2.00 or higher while enrolled in the SUS. GPA is based on a 4.0 system and is calculated by dividing grade points earned by semester hours attempted. It is interesting to note that the percent of community college transfer students earning 2.0 or better has increased from 84.3% in 1983 to 84.9% in 1985.

Table 10 compares two groups of 1984 SUS students, those who transferred prior to earning 60 semester hours at the community college and those who transferred after earning 60 semester hours. Data for previous years are not shown, but are available in prior editions of Articulation.

Tables 12 and 13 present the same data as Tables 10 and 11 except that each N (enrollment) represents the total from a particular college.

Table 14 shows the number of students in each major field of study by university and by SUS. Each of these groups is divided into two subgroups, those whose GPA was higher than 2.00 and those whose GPA was lower than 2.00. Mean GPA for each group is reported in the final column.

Table 15 provides the same data as Table 14, but for the SUS only over the three-year period.

*The State University System (SUS) Data Course File, which is the source for this table, was changed in 1983 to reflect Classification for Instructional Program (CIP) numbers instead of the previously used HEGIS numbers. Therefore, a table comparing current and previous years was impossible to construct. Some categories are new and others have been split into two groups. If comparisons between years must be made, please use the current year data on the previous page and compare the programs by name if applicable.
